

AHMAD HAZWAN SYAUQEE BIN HUSAIRI

Computer Science Graduate | Mobile & Full-Stack Development | AI & Cloud Systems
hzwnsyq@gmail.com | 014-583 0313 | linkedin.com/in/hazwan-syauqee | hazywan.github.io | Petaling Jaya, Selangor

SUMMARY

Computer Science (Intelligent Computing) graduate from Universiti Sains Malaysia with hands-on industrial experience at **MIMOS Berhad**, where I modernised a legacy inventory system end-to-end. My final year project applies **YOLOv8** to real-time road hazard detection, backed by a full-stack cloud deployment (React PWA, Flask on Cloud Run, Firebase) and a human-in-the-loop MLOps retraining pipeline. Most recently built a Flutter product catalog app with pagination, debounced search, and explicit loading, error, and empty states. Comfortable moving across mobile, computer vision, IoT hardware, and cloud-native web systems, and looking to bring that range to a mobile or software engineering team.

EDUCATION

Bachelor of Computer Science (Intelligent Computing) with Honours <i>Universiti Sains Malaysia, Penang</i>	2022 – 2026
• Final CGPA: 3.30	
Foundation in Engineering <i>Pusat Asasi UiTM Dengkil, Selangor</i>	2021 – 2022
• GPA: 4.00 MUET: Band 4.5	
Sijil Pelajaran Malaysia (SPM) <i>SMK Seksyen 4 Kota Damansara, Selangor</i>	2016 – 2020
• Results: 5A 4B	

PROFESSIONAL EXPERIENCE

Industrial Intern <i>MIMOS Berhad</i>	Mar 2025 – Sep 2025
- Extended a legacy PHP/MySQL inventory system (DCIMS) by designing and building two new modules, End User Computing and Software asset management, from scratch, including new database schemas, audit trails, and assignment history tracking. - Prototyped workflows in Figma and built the front-end for device listings, dashboards, and data entry forms with JavaScript/jQuery and Bootstrap, adding real-time feedback via toast notifications and a recent-activity dashboard. - Implemented role-based access control across five user tiers (Server, Network, EUC, Software, and Super Admin) and restructured device categorisation from a location-based to a category-based system, improving lookup and usability across 650+ device records. - Authored UAT test scripts and led acceptance testing sessions with admin groups across four modules, resolving permission errors, data validation gaps, and usability issues raised by end users. - Migrated the system from a local XAMPP environment to a live testing server via WinSCP, debugging permission and configuration issues to stabilise deployment. - Produced an operations user manual and system architecture diagram and worked cross-functionally with senior engineers to align features with end-user operational needs.	

TECHNICAL PROJECTS

Road Hazard Detection System <i>Final Year Project</i>	2025 – 2026
- Built an end-to-end computer vision pipeline using YOLOv8, reaching 83.28% mAP@0.5 on road crack and pothole detection. - Shipped a citizen-facing React PWA, an admin dashboard, and a contractor portal, backed by a Flask API on Google Cloud Run and Firebase Firestore/Auth. - Designed a human-in-the-loop (HITL) MLOps pipeline for continuous model retraining from field-reported data. - Presented at PIXEL 2026, winning Silver; entered into the IEM IDEAS Competition 2026.	
Product Catalog App <i>Flutter</i> <i>github.com/HazyWan/product-catalog-app</i>	2026
- Built a Flutter app consuming the DummyJSON REST API, with infinite-scroll pagination, a product detail screen, and debounced server-side search. - Modelled screen state as a sealed class (loading, empty, error with retry, success) and split the code into data and presentation layers, with a repository handling pagination. - Added pull-to-refresh, image loading and error placeholders, and unit tests for JSON parsing.	
Smart Drain: IoT Blockage & Flood Detection System	2025
- Engineered a smart-city IoT hardware prototype using an ESP32 microcontroller and ultrasonic sensors to monitor drain water levels. - Integrated hardware telemetry with a cloud backend via MQTT, Firebase, and Google Cloud Platform for real-time remote alerts.	
Business Performance Analytics Dashboard	2026
- Built an interactive Tableau dashboard analysing the Superstore retail dataset to expose the gap between revenue and net margin across categories, regions, and time. - Identified a high-volume, low-margin pattern in the Furniture category using side-by-side bar charts, dual-axis trend lines, and treemaps, and translated findings into three actionable business recommendations.	
Toxland VR: Hop & Help <i>Animation & VR Coursework</i>	2026
- Migrated an existing VR board game to Unity 6.3 for the PICO 4 headset, resolving compatibility issues across the upgrade. - Produced the accompanying project report and presentation materials.	

SKILLS

Technical: C++, Python, Java, PHP, SQL, R, JavaScript, HTML/CSS, Node.js, React.js, Vite
Mobile: Flutter, Dart, Provider, React PWA
Tools: Git & GitHub, VS Code, Android Studio / Emulator

Cloud & Systems: Google Cloud Platform (Cloud Run), Firebase, MQTT, YOLOv8, IoT (ESP32)

Data & Analytics: Oracle APEX, sentiment analysis, Altair AI Studio, Tableau

Game & VR: Unity (6.3), PICO 4 VR development

Software: Canva, Blender, Adobe Photoshop, Figma, Microsoft Office

Languages: Malay (native), English (fluent)

COMPETITIONS & EXTRACURRICULARS

Silver Award, PIXEL 2026 | *School of Computer Sciences, Universiti Sains Malaysia* 2026

- Awarded Silver for the Road Hazard Detection System at PIXEL 2026, USM's School of Computer Sciences project showcase.

Entrant, IEM IDEAS Competition 2026 | *Institution of Engineers Malaysia (IEM), Individual Category* 2026

- Entered the Road Hazard Detection System into IEM's Innovation, Design, and Engineering for Advanced Sustainability (IDEAS) Competition.

Participant, Data Challenge 4.0 | *UKM Statistics Club* 2025

- Completed a data analytics competition run by Universiti Kebangsaan Malaysia's Statistics Club, Feb–May 2025.

CERTIFICATIONS

- Certificate of Industrial Internship, MIMOS Berhad — Sept 2025 (24-week residency in full-lifecycle software engineering and legacy modernisation)
- Data-Driven Decision Making: AIoT and V-ONE Data Analytics Perspective, ViTrox Academy — Dec 2025
